

for healing the body naturally!

Candida™ patch is a product that was developed as a complementary therapy program that is accepted by Doctors and Practitioners as an aid to support and restore the body's energetic function.

Made in the U.S.A.

Candida: For many, the breakdown of the immune system and the reduction in friendly bacteria often happens with the overuse of antibiotics - as children, teenagers and into adulthood. The antibiotics destroy the friendly bacteria, allowing the candida to multiply. Remember antibiotics are made from fungi (yeast) – combined with THE SADD - Standard American Dead Diet - sodas, white flour, white sugar, white rice, alcohol, fast food, microwaved, processed food and the like – and over the years, the candida/yeast, which feeds off of these things, grows out of control.

These Apps have been tested extensively and proven by the many that has experienced them to promote improved healing.

The patch or 'bio-apps' are made to rapidly promote and activate the necessary resources to optimize body and brain function, restore missing cell communication, and accelerate the body's natural ability to heal itself.

Candida is a fungal infection that can affect areas such as the:

- Skin
- Genitals
- Throat
- Mouth
- Blood

It is caused by the overgrowth of a type of yeast called Candida, usually Candida Albicans. This yeast is normally found in small amounts in the human body. But certain medicines and health problems can cause more yeast to grow, particularly in warm, moist body areas.

Proper Placement

Place the Candida on the left shoulder of the body. Your body accepts energy far better than the right side. Please follow directions that are stated below for best results.

Candida™

Instructions: Candida is to be applied to your body, (left shoulder).

It was developed to combat candida. Made to last for 3 days, then discard.

Apply another app and wear it for additional 3 days to boosts the immune system.

Repeat this procedure for 30 days to retard the growth of candida.

If needed, continue with procedure for an additional 60 days.
