

Enviro3™

Chemtrails

**Enviro3™ is an Environmental Defense Patch
Designed to protect your body's immune system from chemtrails.**

Made in the U.S.A.

CHEMTRAILS

For years, there has been talk that the government is spraying different chemicals via planes to control or manipulate the weather, and to conduct other chemical tests. The cloud-like lines in the sky that follow an airplane's path as it flies the blue skies may be of concern, and although most air vehicles leave a vapor trail as they fly, the trails that do not immediately dissipate are the ones allegedly seeded with unknown chemicals.

These chemicals are barium, strontium, aluminum, or some other chemical compound(s).

The American Association for the Advancement of Science held a conference that focused on Geo-engineering, and there was a strong correlation to the topics of the conference and what has already been observed by many as Chemtrails. The thought is that spraying some sort of chemical into the sky that is created to remain in the stratosphere with a slow scattering rate will somehow make a cloud effect that acts as a sort of sun-block in an effort to stop or decelerate radiation from the sun and global warming.

The General Accounting Office admitted that Chemtrails exist but that they are "merely" fiberglass particles coated with aluminum whose health effects are unknown but whose existence is now acknowledged after decades of official denial".

Airplane loaded with chemicals ready for dispensing

Reported results from Chemtrails

"Some people are reporting chronic flu-like symptoms, chronic fatigue and body aches that they have never before experienced"

Enviro3™

Instructions: Enviro3™ is to be applied to your body, (left shoulder) in defense of Chemtrail fallout. Made to last for (3) days, then discard. Apply another patch and wear it whenever Chemtrails are visible.

**Increase Endurance | Enhance Body Cleanse | Increased Energy
Increase Immune function | Eliminates flu-like symptoms**
