

for healing the body naturally!

The Stop Crave patch gives you the edge to reduce the symptoms of craving. When your body senses satisfaction from any stimulant such as; nicotine, sugar, alcohol or chemical substance it reaches the brain in about 10 to 20 seconds.

Made in the U.S.A.

The duration that cravings last after discontinuation varies between different substances. For instance, in smoking cessation, a substantial relief is achieved after approximately 3–6 months, but feelings of craving may temporarily appear even after many years following cessation. The Stop Crave patch supports your transition to break the cycle of addiction by Bio Energy Synthesis Technology. This patch is a non-drug therapy.

Do you have the DESIRE to STOP smoking, drinking alcohol or crave sugar?

The Stop Crave patch gives you an edge to stop the craving. When your body senses satisfaction from any stimulant such as; nicotine, sugar, alcohol or chemical substance it reaches the brain in about 10 to 20 seconds. This causes a chemical called dopamine to be released in the brain. Dopamine provides a feeling of pleasure and satisfaction.

By using the Stop Crave patch on a regular time table, your anxiety and stress associated with withdrawal symptoms begin to diminish. The Stop Crave app counteracts the craving in about 15 minutes. The Stop Crave is made to rapidly activate and promote the necessary resources to optimize body and brain function to reduce craving.

Proper Placement

Stop Crave is to be applied to your body to start the process to suppress the craving. The left side of the body accepts energy far better than the right side. Please follow directions that are stated below for best results.

Stop Crave™

Instructions: The Stop Crave is to be applied to your body, (left shoulder) to reduce the craving symptoms. It's made to last for 3 days, then discard. Apply another patch and wear it for additional 3 days until craving is reduced. Continue this procedure for 60 days or until the craving subsides.

Contents: 10 apps, a (30) day supply.

If needed, continue with procedure for an additional 60 days.
