

AO-X, Anti-Oxidant Patch

for healing the body naturally!

The antioxidant patch™ is a product that was developed as a complementary therapy program that is accepted by Doctors and Practitioners as an aid to help the body to replace antioxidants, naturally.

Made in the U.S.A.

THE BENEFITS OF THE ANTIOXIDANT PATCH

The human body naturally produces free radicals and the antioxidants to counteract their damaging effects. However, in most cases, free radicals far outnumber the naturally occurring antioxidants your body produces. To maintain the balance, constant supplies of antioxidant are needed to obtain the maximum benefits of antioxidants. The AO-X, antioxidant patch is made to encourage your body to produce additional antioxidants.

The AO-X patch is programmed with the frequencies of fresh berries, green tea, red chili pepper, (capsaicin), vitamins A, C and minerals that are needed for optimum health, especially in today's polluted world. In programming the AO-X patch our engineers included additional frequencies found in nature, and because they are so varied, different antioxidants provide different benefits to various parts of the body. For example, beta-carotene (and other carotenoids) is programmed into the AO-X patch which is very beneficial to eye health; lycopene is beneficial for helping maintain prostate health; flavonoids are especially beneficial for heart health; and proanthocyanidins are beneficial for urinary tract health.

Antioxidants come up frequently in discussions about good health and preventing diseases. ABC advocates that boosting your antioxidant supply by wearing the AO-X patch can help provide additional protection for the body against: Heart problems, Eye problems, Memory problems, Mood disorders, Immune system problems.

WHAT IS AN ANTIOXIDANT?

Antioxidants help fight oxidation, a normal chemical process that takes place in the body every day. It can be accelerated by stress, cigarette smoking, and alcohol. When there are disruptions in the natural oxidation process, highly unstable and potentially damaging molecules called free radicals are created. Oxygen triggers the formation of these destructive little chemicals, and, if left uncontrolled, they can cause damage to cells in the body. It's much like the chemical reaction that creates rust on a bicycle or turns the surface of a cut apple brown.

Proper Placement

Place the Antioxidant patch on the left shoulder of the body. Your body accepts energy far better than the right side. Please follow directions that are stated below for best results.

AO-X Antioxidant Patch

Instructions: The Antioxidant patch is to be applied to your body, (left shoulder). It was developed to protect the body from Free Radicals. Made to last for 3 days, then discard. Apply another patch and wear it for additional 3 days to prevent illnesses.

Repeat this procedure for 30 days to reduce infection.
If needed, continue with procedure for an additional 60 days.

Free Radicals

Free radicals are not only generated by the body, they are present in foods you eat as well as in the air you breathe. Some even come through exposure to sunlight that can harm the eyes and the skin. Free radicals can trap a low-density lipoprotein (LDL) in an artery wall and begin the formation of plaque; they can damage DNA; or they can change the course of what enters and leaves a cell.

Any of these actions can be the start of a disease process.
