

Great Brain

for healing the body naturally!

The Great Brain patch is a **NON-DRUG** product that was developed as a complementary therapy program that is accepted by Doctors and Practitioners as an aid to support and restore the brain's energetic function.

How the Brain Works:

Every animal you can think of -- mammals, birds, reptiles, fish, amphibians -- has a brain. But the human brain is unique. Although it's not the largest, it gives us the power to speak, imagine and problem solve. It is truly an amazing organ. Your brain is made of approximately 100 billion nerve cells, called neurons. Neurons have the amazing ability to gather and transmit electrochemical signals -- think of them like the gates and wires in a computer.

Neurons share the same characteristics and have the same makeup as other cells, but the electrochemical aspect lets them transmit signals over long distances (up to several feet or a few meters) and send messages to each other.

Neurons come in many sizes. For example, a single sensory neuron from your fingertip has an axon that extends the length of your arm, while neurons within the brain may extend only a few millimeters.

They also have different shapes depending on their functions. Motor neurons that control muscle contractions have a cell body on one end, a long axon in the middle and dendrites on the other end. Sensory neurons have dendrites on both ends, connected by a long axon with a cell body in the middle. The Great Brain patch helps to restore the energy that responds to memory and focus.

Proper Placement

Place the Great Brain patch on the left side of the body, the left side accepts energy far better than the right side. Please follow directions that are stated below for best results.

Great Brain

Instructions: The Great Brain patch is to be applied to your body, (left shoulder) to enhance your mental concentration. Made to last for 3 days, then discard. Apply another patch and wear it for additional 3 days to enhance mental awareness.

Repeat this procedure for 30 days to improve mental capabilities.
